www.haramberun.com

EXECUTIVE SUMMARY

#StartupsHarambeRun: Uganda's startup ecosystem does not suffer from a shortage of capital, it suffers from a drought of investable ventures and a local investor culture that has not been equipped or invited to write cheques into early-stage ventures. This leaves Uganda's own capital tied in savings and hard assets. This has presented a dilemma where students graduate trained to seek jobs rather than build fundable businesses/startups, while local investors remain disconnected, under-educated on opportunities to invest in local startups.

The Problem:

Uganda's startup pipeline starts at universities just like anywhere in the world; hatcheries of talent who become entrepreneurs then seek investors. But apparently that system is broken, even with emerging university hubs, startups are not empowered to become investable, support stops at soap making, basic app-building, grant-winning projects, etc.

The Solution:

Collaborating with Uganda's active ecosystem builders & enablers, the #StartupsHarambeRun is committed to convert goodwill into a functioning pipeline of investable startups.

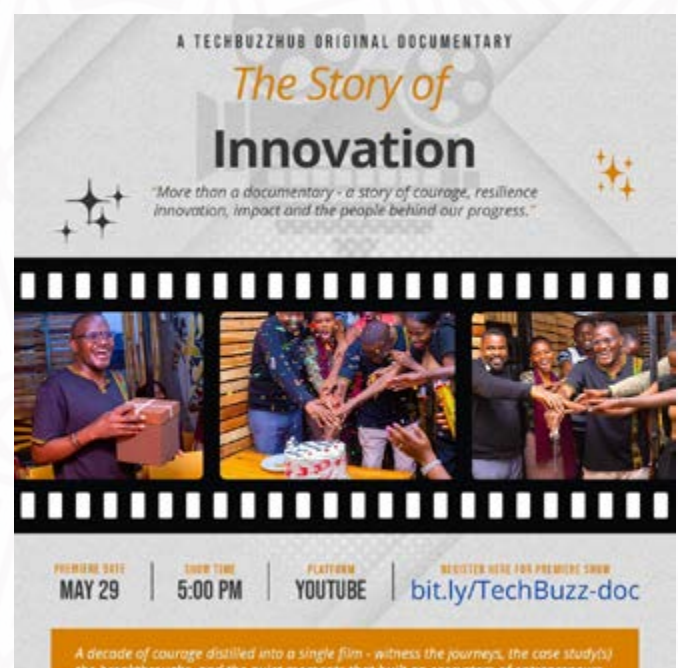

The fund will:

1. Run investor facing startup development programs in over 10 universities.
2. Provide catalytic funds to over 100 startups.
3. Train over 50 Angel investors & form at least 5 Angel Investor Networks in Uganda

TechBuzz Hub, a center of excellence on innovation, at 10 years of startup ecosystem impact, has championed another ecosystem growth tier focused on investment and funding the startup ecosystem under the Startup Funding Vehicles (SFV) initiative - which has already trained 650+ Ugandans on angel investing, venture capital and blended finance.

Since Inception, SFV has implemented interventions such as; kampala-to-Nairobi, investor exposure tour, The catalysing Angel investor research and now; The #StartupsHarambeRun, an annual, inter-university fundraising run converging from 8 university campuses and community stations onto a single finish line at Makerere University.

The Startups Harambee Run is not another charity event. It is a pipeline-building model, to strengthen three interdependent stages that sustain Uganda's entrepreneurship ecosystem, students, entrepreneurs/startups and investors. The resources mobilised from the run shall be used to invest into the student startup development programs, hackathons, proof-of-concept grants, incubation for early-stage ventures and development of investor networks. This shall improve the number of Ugandan entrepreneurs successfully securing investment, turning a single annual event into permanent ecosystem infrastructure. This initiative provides the youthful and Uganda's dominant population, the foundation to drive the country's ambitious 10-Fold growth strategy. It also builds the ideal link and benchmark for the success of industry-to-academia partnerships.

THE RUN TARGETS.

Unlocks capital/money by funding Startups, training investors & forming investor networks. Join #StartupsHarambeRun as a sponsor, partner, donor, runner, well-wisher or mobiliser to help turn goodwill into investable startups, local capital, catalytic funds, angel investors and create jobs for our unemployed youth.

ABOUT TECHBUZZ HUB

Founded in 2016, TechBuzz Hub has established itself as one of East Africa's leading innovation hubs and a driving force within Uganda's rapidly evolving startup ecosystem. Over the past decade, the hub has played a transformative role in nurturing entrepreneurial talent, strengthening innovation capacity and empowering more than 15,000 entrepreneurs and young professionals through world class coworking, incubation, mentorship and capacity-building programmes. Its consistent commitment to ecosystem development has positioned

TechBuzz Hub is a trusted centre of excellence for innovation, collaboration and enterprise growth in the region working closely with policymakers to contextualise innovation, investment and digital transformation within national development priorities. This influence, combined with its globally recognized achievements, including being named Africa's Best Coworking Space in 2023 Addis Ababa, Ethiopia and the Best Coworking Space Globally 2024, Istanbul Turkey by Global Startup Awards, earning international recognition for excellence in innovation infrastructure, underscores its credibility as a hub capable of convening high.

- ★ Best Coworking Space globally 2024 - Istanbul, Turkey
- ★ Best Coworking Space in Africa 2023 - Addis Ababa, Ethiopia

Our Vision

To create spaces that transform ideas into successful corporations.

Our Mission

To support entrepreneurs, startups and youth achieve their enterprise development goals, create jobs and find employment opportunities.

As TechBuzz Hub marks its tenth anniversary in 2026 and embarks on its ambitious 10X Growth Strategy, it stands at a defining moment of expansion and increased regional influence. TechBuzz Hub's leadership extends beyond programme delivery to shaping the broader policy and strategic landscape for innovation in Uganda. Under the stewardship of its leadership, the hub has played a pivotal role in advancing Uganda's startup policy framework. With its proven operational capacity, deep ecosystem connections, strategic vision and strong institutional track record, TechBuzz Hub is exceptionally positioned to champion the startup ecosystem towards enabling the investment ecosystem

ABOUT SFV

The Startup Funding Vehicles (SFV) initiative, championed by TechBuzz Hub, is a bold platform dedicated to strengthening early-stage startup financing in emerging markets by mobilising local investment capital and developing mechanisms that facilitate angel and early-stage investment. The organization focuses on building the infrastructure needed for sustainable startup financing ecosystems, particularly in regions where entrepreneurs face significant challenges accessing capital beyond friends, family or grant funding.

This initiative has trained 650+ individuals on Startup investment, including angel investing, venture capital, blended financing, impact investment, implemented interventions such as; Kampala-to-Nairobi investor exposure tour, the catalysing Angel investor research and now the #StartupsHarambeRun. Through SFV, we aim to reduce the reliance of local startups and entrepreneurs on foreign aid and unlock sustainable, locally-driven economic growth to accelerate the Tenfold Growth Strategy focused on ATMS (Agro-industrialisation, Tourism dev't, Mineral-based indust. and Science [tech & innovation]), the NDP IV and vision 2040 in order to achieve middle income. SFV is a collaborative effort involving several existing and potential partners, including; Uganda Management

Institute (UMI), Makerere University(MAK), African Federation of Business Angels network (AFBAN), TechBuzz Hub, Talent for Wealth, etc. SFV aims to train and empower local investors, undertake investors/funding research, establish investor networks and support centers and orchestrate strategic collaborations across the country.

SFV works with investors, ecosystem builders, research organizations and policy stakeholders to improve the availability and effectiveness of startup funding. Its activities span research, capacity building, investment structuring and the development of collaborative platforms that connect startups with potential investors. Through such initiatives, SFV helps highlight structural gaps in early-stage financing and supports the development of solutions such as angel investor education programs, startup investment readiness initiatives and mechanisms for investor collaboration and syndication.

By promoting the formation of angel networks, supporting investor capacity development and advancing innovative funding vehicles, SFV contributes to building stronger startup ecosystems. Its efforts aim to unlock domestic capital for entrepreneurship, support the growth of high-potential startups and accelerate innovation-driven economic development across emerging markets

SFV OBJECTIVES

- To build local investor capacity for early-stage financing
- To generate research and evidence to close structural financing gaps
- To generate research and evidence to close structural financing gaps
- To mobilize domestic capital to reduce startup dependence on foreign aid/grants

Personal Engagement with Tech Entrepreneurship

BACKGROUND OF THE RUN

Uganda receives an unreasonably small share of both African venture capital and East African private equity, with just 15% of regional Private Equity (PE) investment mostly going into agribusiness and health. While Africa attracted \$2.6 billion in VC across 427 deals in 2024, this was concentrated in Nigeria, Kenya, South Africa, and Egypt. Uganda's limited foreign capital arrives mainly as donor grants rather than equity, favoring promising ideas over investable ventures. This creates a market saturated with grant dependent ventures lacking investor interests, ultimately leaving investors without viable businesses/ startups to back, according to UNDP/ Startupblink

Research has consistently revealed that there are three groups of actors that play distinct roles in sustaining the entrepreneurship ecosystem in Uganda. Students, entrepreneurs and investors. Each group feeds into the other to create a pipeline that when disrupted at any stage, cuts off deal flow. If students are not equipped with adequate knowledge on how to create investable businesses/ startups, the pipeline becomes saturated with entrepreneurs operating uninvestable businesses/ startups or no scalable businesses/startups at all, just like we know the 700,000 graduates released yearly. If entrepreneurs lack the required technical capacity to run profitable businesses/startups, investors hesitate to invest, affecting job creation and economic transformation.

There is therefore a need to address issues created at the top of the pipeline in order to prevent them from affecting the system as a whole.

At present, there are insignificant investor anchored interventions focusing on ensuring students are adequately equipped to create investable startups and other existing interventions tend to be short-lived and experience funding constraints relative to the scale of the problem.

An inclusive fundraising run is proposed as a vehicle for addressing the pipeline issue and mobilizing resources to empower student ventures, startups / entrepreneurial capacity development and catalysing investor networks and opportunity awareness.

PROBLEM STATEMENT

According to Venture Capitalists and Angel Investors exploring opportunities in Uganda, Uganda's startup ecosystem is not constrained by a shortage of capital, but by a drought of startups built for investment and the absence of a local investor culture familiar with writing cheques for early-stage risk ventures.

At the same time, most Ugandans prefer saving to investing. They prefer low-risk options like treasury bills and bonds compared to investing in high-risk ventures, much as they often provide high returns. For instance, a UGX 5,000,000 invested in a one-year Treasury Bill or a 10-year Treasury Bond earns 14–17% annually, and earns about UGX 700,000 to 850,000 a year. The same UGX 5,000,000 invested in a fairly successful startup, over a medium-term 5-year horizon, could instead return an average of UGX 25,000,000, a 5X return significantly outperforming public securities over the same period and yet most Ugandans would still prefer to invest in bills or bonds.

In addition to the above, potential local investors and the average Ugandan with capital gravitate towards hard assets like real estate or acquiring public shares from established corporations over the perceived risk of early-stage equity in startups.

This is compounded by an education and exposure gap. Most Ugandan founders, including talented students, have never been taught to build businesses/startups through the lens of an investor and most local investors have never been introduced to startup investing as a credible venture or asset class.

The result is a broken pipeline on both ends. Students and youth with entrepreneurial potential graduate into a system that trains them to seek jobs rather than build fundable businesses/startups. On the other hand, local individuals and institutions with capital to deploy remain disconnected from the ecosystem, uneducated on how to evaluate startup risk and reluctant to be the first movers who prove that Ugandan startups can generate real returns.

Uganda's startup pipeline starts at universities just like anywhere in the world; hatcheries of talent who become entrepreneurs then seek investors. But apparently that system is broken, even with emerging university hubs, startups aren't empowered to become investable, support stops at soapmaking, basic app-building, grant-winning projects. etc

THE INTERVENTION:

#StartupsHarambeRun

The Startups Harambee Run addresses the drought of startups built for investment and the absence of a local investor culture. This model democratizes participation by allowing several stakeholders to take part by running, sponsoring or donating to pool resources towards a shared cause. This model allows for community-driven resource mobilisation in support of the startup pipeline and cultivating the local investment culture. Uganda's run culture has already proven to be an effective model in raising funds for social causes: events like the Uganda Rotary Cancer Run and Kabaka Run have generated hundreds of millions of shillings by converting broad public goodwill into pooled tangible impact

In addition, the event invites participation from universities, media networks, SMEs, large corporations, government agencies, development partners, research institutions and investors of all types (local, diaspora and international), building a broad coalition of committed stakeholders. This directly answers the ecosystem's recurring complaint that startups, investors and institutions operate in silos. The run creates a single, visible

convening point where corporate CSR budgets can be redirected toward genuine investment engagement, government can demonstrate policy commitment publicly and local investors can be introduced to the pipeline collectively rather than being asked to take on first-mover risk alone

Participation is not framed as charity, but as a deliberate statement of support for strengthening Uganda's investor pipeline. This distinction matters because Uganda's funding gap is not due to a shortage of capital but a shortage of investable businesses/startups and scarcity of investors willing to back them. By channeling funds specifically toward preparing students to build investable companies, the run positions itself as a pipeline-development mechanism.

Collaborating with Uganda's active ecosystem builders & enablers, the #StartupsHarambeRun is committed to convert goodwill into a functioning pipeline of investable startups. The fund will: Support over 100 startups across 10 universities and build five Angel Investor Networks by training 50 investors.

ABOUT THE RUN

Startups Harambee Run is an annual, inter-university fundraising run designed to mobilize support and diverse stakeholders around a single mission: strengthening Uganda's entrepreneurship investment pipeline by preparing student entrepreneurs, supporting their ventures and empowering local investors to write cheques into Ugandan startups

Objectives

- To raise seed capital and transferably fund student-led startups education programs for investability across participating universities
- To create a recurring, highly visible platform for supporting startup pipeline of students, entrepreneurs/startups and investors
- To strengthen job creation, stakeholder awareness and private-academia collaboration and partnerships for a shared goals

What to Expect

- Multi-stakeholder community (Students, Investors, Founders, entrepreneurs)
- Influential Keynote speakers from investment and start up ecosystem
- A prize for the winners: 1st, 2nd and 3rd runners up on every route.
- Pre-run virtual workout with professional coaches.
- A unique finish line location, race format and mobilisation approaches.

ABOUT THE UNIVERSITIES

Since students are the target beneficiaries for the StartupsHarambe Run, TechBuzz Hub will be partnering with 10+ universities within Kampala to execute the event. These universities will act as the starting points for the run, with runners from each campus making their way to the Makerere University Main Campus, which will be the finishing point. Students from the Makerere campus will chart a course around the campus and arrive at their starting point.

About Makerere University

Makerere University is the oldest, largest, and most highly ranked public higher education institution in Uganda. Founded in 1922, Makerere University has over 140 programs across the humanities, sciences and technology. With its vast campus and position as an academic leader, TechBuzz Hub believes Makerere University is the ideal finishing location for the Startups Harambee Run.

About the Dispatch Centres

In order to encourage further participation from university students, TechBuzz is partnering with distinguished universities as dispatch centers. Official running routes will be determined from each university to Makerere's Main Campus, and students or members of the general public are welcome to begin the run from any of the following campuses:

ABOUT THE INNOVATION HUBS

For over a decade, Uganda's innovation ecosystem has been carried by privately run hubs and practitioners who saw the gaps and worked, each in their own capacities, to close them. TechBuzz Hub is proud to be one of them. Together, we founded **Startup Uganda**, bringing 30+ innovation hubs into one consortium to increase investment in and through ESOs, strengthen the sector, engage government, and represent the diversity of entrepreneurs across Uganda.

Yet one ingredient has remained missing: patient, early-stage capital from local investors, and a credible investable pipeline to receive it. That gap is what the Startup Funding Vehicles initiative, and the **#StartupsHarambeeRun**, now exist to close.

This is our full engagement and expression of collaboration not a parallel effort, but an extension of infrastructure Startup Uganda and its member hubs have already built. We are working with hubs, universities, and institutional centres to mobilise resources, build awareness, and train hubs and local investors alike, so they can directly champion angel investing within their own communities.

Our ambition is simple: to turn Uganda's potential investor ecosystem into a strengthened national platform of investors and investable startups, the missing link that finally lets local capital reach the entrepreneurs ready to create jobs and build Uganda's investable future.

#StartupHarambeRun at a Glance

Who is attending

- Students and institutions of higher learning
- Entrepreneurs, startups and MSMEs/SMEs
- Large corporations
- Government agencies and funds
- Banks and other capital providers

StartupHarambe Run

The Run Map

BENEFITS

Joining the run is just the first step into a much bigger movement. Beyond the day itself lies a transformational journey which offers immediate and tangible benefits to every participant as highlighted below

- Seed funding for student entrepreneurs
- Grant provision for investable startup development programs.
- Industry - academia, partnerships championed across different universities.

Partners

- Public exposure through pre-event promotion
- Event-day branding
- Wide media coverage to a diverse audience and post-event storytelling
- Visibility through shareable content such as runner stories and donation milestones.
- Contribute to a platform for thought leadership and shaping the conversation on startup quality and entrepreneurial education.

Students

- Sponsored hackathons across each campus
- 24 university entrepreneurship bootcamps for skills development and team-building

Entrepreneurs

- Small-size matching grants or equity investments, deployed through local angel investor networks.
- Incubation support addressing technical and operational capacity gaps (governance, financial management, market strategy).

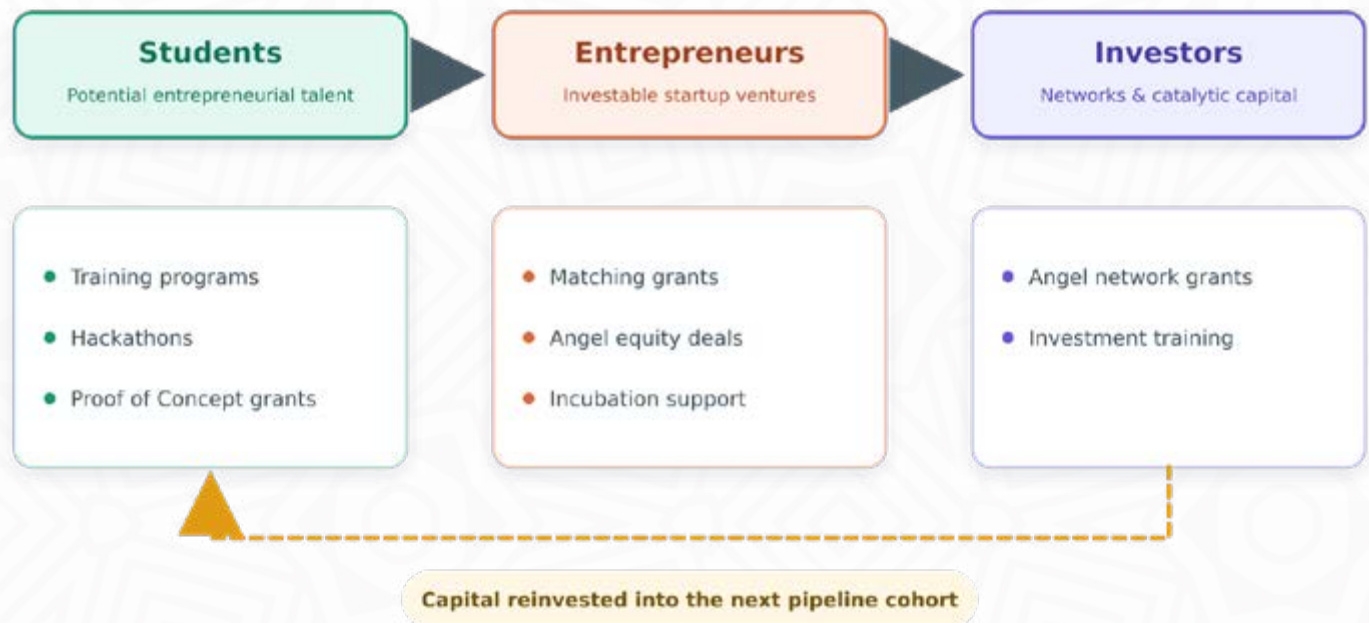

Investors

- Structured exposure to a pre-vetted, incubated deal pipeline.
- Investor education and onboarding through the Run's platform.
- Co-investment and syndication opportunities.
- A recurring, credible platform (via the annual Run) to build trust and track record.
- Small-size catalytic grants for launching Angel Networks.

FUNDFLOW AND MANAGEMENT

The mobilised funds will be managed in a transparent and clear manner. A steering committee consisting of investment advisors, TechBuzz Hub, Buzz Capital ventures, University representatives and an independent finance consultant. The funds proceeds shall be used to address the pipeline issue by appropriating the funds into student support- 40%, entrepreneur support- 30% and investor ecosystem support at 30%.

A Fundraiser report is delivered in real-time on the haramberun website for transparency on funds raised and disbursement shall be done in accordance with a clear award criteria.

By addressing all three stages simultaneously - rather than funding students in isolation or startups in isolation - the Run is designed to prevent the pipeline disruption described above, ensuring that improvements at the top of the funnel (students) are not wasted for lack of capacity in the middle (startups) or capital at the end (investors).

MODE OF PAYMENT

All financial contributions to the Startups Harambee Run including ticket purchases, sponsorships, donations except for large contribution, will be processed through a dedicated event website:

www.haramberun.com Donation records captured through the site will be maintained for internal reporting and external accountability.

This platform will serve as the central hub for both fundraising and event logistics, offering:

- An integrated payment gateway enabling secure, seamless transactions for ticket sales, sponsorship packages and individual or corporate donations
- An interactive donor showcase displaying the identities (named or anonymous, based on donor preference) of contributors alongside the amounts raised, fostering transparency and public recognition of support.
- Route maps and event information helping participants plan their involvement.

2026 ANNUAL #STARTUPSHARAMBERUN

SPONSORSHIPS

Sponsorship opportunities are open to organisations and individuals who wish to be part of this noble cause aiming at raising a new breed of entrepreneurs capable of building investable ventures and nurturing a lasting culture of local investment

By partnering with the 2026 Annual Startups HarambeRun, sponsors will gain unique access to a powerful network of potential entrepreneurial talent, high-impact startups, investors, policymakers, corporate organisations and the future of Uganda's entrepreneurship ecosystem.

SPONSORSHIP TIERS

Platinum Sponsor

UGX 75,000,000

This is the highest-level partnership package available, positioning the sponsor as a lead champion of the Ugandan startup ecosystem.

Benefits

- Premium logo placement on all run kits.
- Branded presence on the main event stage.
- Prominent, top-tier feature on the event website including logo and dedicated write-up.
- VIP access to a curated engagement session with founders, investors and ecosystem stakeholders.
- Premium logo placement on all run kits.
- Branded presence on the main event stage.
- Prominent, top-tier feature on the event website including logo and dedicated write-up.
- VIP access to a curated engagement session with founders, investors and ecosystem stakeholders.
- Speaking opportunity or acknowledgment during the event program.
- Recognition across all press releases, media coverage, and post-event reporting.
- Platinum corporate membership with Startup Funding Vehicles (SFV)
- Angel investor training scholarship
- Startup pipeline access
- Entrepreneurial pipeline access
- Graduate Professionals Apprenticeship Program (GPAP) trained talent Access.

Gold Sponsor

UGX 40,000,000

This is a strong visibility package for organizations seeking strategic brand association with the development and growth of the startup ecosystem through facilitating the creation of investable ventures

Benefits

- Logo placement on event signage, banners, and route markers
- Inclusion in official digital promotion (website, email campaigns, social media features)
- On-site recognition during the event (announcements, branded stations)
- Mid-tier feature on the Run website.
- Invitation to a post-event stakeholder engagement or networking session
- Gold corporate membership with Startup Funding Vehicles (SFV).
- Angel investor training scholarship
- Graduate Professionals Apprenticeship Program (GPAP) trained talent Access.
- Startup pipeline access

Silver Sponsor

UGX 25,000,000

This package is ideal for meaningful visibility, it is suitable for mid size organisations and institutions looking to unlock quality opportunities from the startup ecosystem.

Benefits

- Logo inclusion on select printed materials like posters, route maps, participant guides
- Mention across select social media posts and digital channels
- Standard acknowledgment during the event program
- Standard listing on the Run website
- Silver corporate membership with Startup Funding Vehicles (SFV).
- **Angel investor training scholarship.**
- Graduate Professionals Apprenticeship Program (GPAP) trained talent Access.

BECOME AN INVESTOR TRAINING

Make confident, informed investment decisions.

Sponsorships & Syndicating

SfV STARTUP FUNDING VEHICLES

START-UP

Analysis, Capital, Planning, Teamwork, Idea, Business

Bronze Sponsor

UGX 10,000,000

This package offers solid brand exposure and is well-suited for organisations and businesses looking to build early association with Uganda's growing startup ecosystem.

Benefits

- Logo inclusion on the Run website sponsor listing
- Mention in select social media shout-outs
- Acknowledgment during the event program
- Distribution of branded materials (flyers/merchandise) at the event, subject to approval
- Bronze corporate membership with Startup Funding Vehicles (SFV).
- Graduate Professionals Apprenticeship Program (GPAP) trained talent Access

SECTOR-SPECIFIC PACKAGES

Government and Policy Partner Package

UGX 100,000,000

This package is tailored for government Ministries, Departments, and Agencies to demonstrate commitment to national priorities such as NDP IV, Vision 2040, and the Tenfold Growth Strategy (ATMS). By joining this cause, government partners will be directly involved in job creation and economic growth, gaining a visible platform to showcase alignment between public policy and private-sector-led economic transformation

Benefits

- Prominent government/ministry branding across event materials and communications.
- Feature in the post-event report as a strategic policy partner.
- Speaking opportunity during the event program.
- Recognition in press releases and media coverage as a champion of national development priorities.
- Platform to publicly demonstrate alignment and awareness creation about NDP IV, Vision 2040,

Development Partner Package

UGX 80,000,000

This package is tailored for international development organizations and donor agencies whose mandates align with locally-driven capital mobilization and reducing foreign aid dependency as a shift towards a sustainable, homegrown investment ecosystem.

Benefits

- Recognition as a Development Partner across event communications and reporting
- Feature in the post-event report as a strategic partner promoting a sustainable, homegrown investment ecosystem.
- Visibility across the run website, social media, and press engagements
- Invitation to post-event stakeholder engagement sessions with founders and investors
- Acknowledgment during the event program

Corporate Venture Capital (CVC Firm) Partner

UGX 50,000,000

This package is designed for corporate venture capital firms seeking strategic visibility and early access to Uganda's investable startups. It positions the firm as an active enabler of the local investment ecosystem, with direct exposure to founders, co-investors, and the broader startup community.

Benefits

- Logo placement on event signage, banners and the Run website
- Early access to a curated pipeline of trained, investable startups
- Invitation to post event stakeholder engagement sessions with founders and fellow investors.
- Recognition as a CVC Partner across official digital marketing platforms website, email campaigns, social media.
- On-site acknowledgment during the event program
- Corporate membership with Startup Funding Vehicles (SFV)

Diaspora Investment Package

UGX 20,000,000

This package is tailored for Ugandans in the diaspora interested in strengthening the investor ecosystem back home through remote financial contributions.

Benefits

- Recognition as a Diaspora Partner on the Run website and event communications.
- Access to remote participation options (remote donations)
- Feature in diaspora-focused social media and email campaigns.
- Acknowledgment during the event program and in the post-event report.
- Invitation to virtual or in-person stakeholder engagement sessions with founders and investors.

DID YOU KNOW?

You could become an **Angel Investor** today?

Angel Investor Package

UGX 15,000,000

This package is designed for local, diaspora, and international angel investors seeking an opportunity to directly back the pipeline itself. By joining this cause, angel investment partners have the opportunity to support the creation of investable startups and a strong investment ecosystem that benefits them directly.

Benefits

- Early access to a pipeline of trained, investable startups.
- Recognition as an Investor Partner across event communications
- Invitation to post-event stakeholder engagement sessions with founders.
- Feature in the post-event report as a strategic partner promoting a strong investment ecosystem.
- Acknowledgment during the event program.
- Angel investor training scholarship.

Enterprise Sponsorship Package

UGX 10,000,000

This package is designed for large organisations, SMEs, and individuals who wish to support the cause and gain foundational visibility within the startup ecosystem.

Benefits

- Name/logo listed among supporting sponsors on the Run website.
- Group mention in a dedicated sponsor appreciation post.
- Certificate of recognition as a supporting partner
- Bronze corporate membership with Startup Funding Vehicles (SFV).

PLUG-AND-PLAY

COWORKING OFFICES

Affordable. Fully-Furnished. Flexible

Starter Virtual Offices Available!

Academic & Research Partner Package

UGX 10,000,000

This package is tailored for universities and research institutions to sponsor and provide in-kind venue support in exchange for collaborative research opportunities, data access on the startup/investor landscape,

Benefits

- Recognition as an Academic & Research Partner across event platforms.
- Access to collaborative research opportunities and startup/investor landscape data.
- Structured student engagement opportunities (volunteering, internships, investability training).
- Feature in the post-event report.
- Invitation to post-event stakeholder engagement sessions with founders and investors

EVENT-SPECIFIC PACKAGES

Media & Visibility Partner - In Kind (In-kind equivalent)

UGX 40,000,000

In-kind sponsorship from media houses and networks in exchange for broad coverage, brand alignment with a high-goodwill cause, and content collaboration such as interviews, features, and live coverage that extends the run's reach beyond event day. What you get;

- Recognition as the Official Media Partner across event branding
- Content collaboration opportunities (interviews, features, live coverage)
- Brand alignment with a high-goodwill, national cause
- Prominent logo placement on event materials and the Run website
- Acknowledgment during the event program

TECHBUZZ HUB STARTUP INCUBATION PROCESS

Six value propositions that take a founder from idea to market.

In-Kind/Logistics Sponsor

UGX 20,000,000

This sponsorship package is for organisations or individuals providing non-cash resources / contributions like water, transport, security, energy boosters or general logistics.

Benefits

- Public recognition for enabling smooth event execution of the event
- Logo placement on event signage and relevant branded stations
- Mentions across select social media and digital channels
- Standard listing on the Run website
- Acknowledgment during the event program

Running Kit Sponsor

UGX 30,000,000

This will cover the cost of branded merchandise and welcome items distributed to all participants, such as water bottles, running vests, t-shirts, and other promotional materials. This track offers direct, tangible brand exposure, as every participant physically carries the sponsor's branding throughout and after the event, extending visibility well beyond race day.

Benefits

- Sponsor branding featured on run kit items (bottles, vests, t-shirts, etc.)
- Recognition as the Official run kit Sponsor on the Run website and event materials
- Mention across social media and digital promotion platforms
- Acknowledgment during the event program
- Extended post-event brand visibility as participants continue using branded items

Prize Sponsor

UGX 20,000,000

This sponsorship will cover the cash prizes, trophies, or rewards for top finishers creating high visibility during the awards ceremony of the event. The category winners shall include; Best fundraising team, Fastest runner, Most creative team spirit.

Benefits

- Recognition as the Official Prize Sponsor during the awards ceremony.
- Branding on trophies and prize presentation materials.
- Mention across social media, especially during winner announcements.
- Feature on the Run website and event program.
- High-visibility association with achievement and celebration moments.
